PROJECTS

drip:

Individual project (9 weeks)

- Collaborated effectively with a UX/UI designer to create a sleek and modern website.
- Developed using React, TypeScript and CSS, ensuring a responsive and user-friendly experience.
- Integrated multilingual support with a Māori/English language switch to enhance user accessibility and usability.

PocketPulse

Team project (Ongoing)
Role: *Database management and Front-end styling*

- Contributing to a Full-Stack mobile app project as part of a five-member team, including QA Specialists, a Software Tester, and a UX Designer.
- Developing the app with React Native and Tailwind CSS for the Front-End, and using MySQL and Firebase for the Back-End.
- Participating in weekly stand-ups and maintaining daily communication with the team to align on project goals.

Juddy AI

Individual project (4 weeks)

- Developed a personal AI chatbot using React and JavaScript.
- Integrated Google API for natural language processing and AI response.
- Implemented Clerk for secure user authentication.

Dynamic Dashboard

Team project (3 weeks)
Role: *Scrum Master also in charge of API integration for Back-end and Front-end styling*

- Led a five-member team to develop a dynamic dashboard with customisable widgets and drag and drop functionality.
- As a scrum master, facilitated Agile processes, organised stand-ups, and ensured the team stayed on track with our sprint goals.
